Adjusted Interim Levy Rate

LCCC has adjusted the Interim Levy Rate for Q4 2017 down to £1.567/MWh from its previous value of £2.517/MWh. This is effective from 15 November 2017 until 31 December 2017.

In arriving at its decision to adjust the Interim Levy Rate, LCCC has considered the expectation of lower costs and higher eligible demand for the fourth quarter of 2017, based on actuals to date and projections of the costs over the remaining period.
